TO Mayor Lois Frankel and City Commissioners  
FROM Justice Ira J. Raab, Vice Chair, City Green Task Force  
RE "Turn Off The Lights" Switch Cover Stickers  
DATED April 10, 2009

I enclose for your consideration correspondence regarding a proposal for Florida Power and Light to supply to the City free "Turn Off The Lights" stickers, to be affixed to the light switch plates (which are not on sensors) in City government buildings, thereby reducing the City's electric bill, and at the same time, making the City greener.

Should you adopt the proposal, it would be a "win-win" for the City.

Dear Donald:

I, too, am glad that we met at the Sustainability Conference and discussed the possibility of Florida Power and Light (FPL) supplying free "Turn Off The Lights" switch cover stickers for the light switches in the City's government buildings. I greatly appreciate your bringing the sticker proposal to your superiors.

Thank you for sending to me the sample stickers, and advising me that FPL agrees to supply the free switch cover stickers to the City.

I will send to Mayor Lois Frankel and to the Commissioners, for their consideration, copies of our correspondence, together with the articles on the stickers which the Long Island Power Authority (LIPA) supplied to the New York State Court System, when I was the Chief Judge of the Nassau County District Court in New York. I will also send a copy to Penni Redford, who formerly served as the City's Liaison to the City Green Task Force (CGTF), and who now serves as the City's new Sustainability Director.

Should the Mayor and her Commissioners accept the proposal, I am certain that you will hear from the Mayor or from a member of her staff.

Sincerely,

JUSTICE IRA J. RAAB  
Vice Chair, CGTF

Justice Raab -

Again, it was a pleasure to meet you at the Sustainability Conference.

Thank you for your suggestion of working with the City on providing switch cover stickers for the city's governmental buildings.

Attached are examples of a couple of stickers that we've provided in the past.

While I understand the majority of lights at City Center are on sensor, should the Mayor wish for us to provide similar switch covers stickers for the city, I'd be happy to coordinate the efforts.

Thank you for your time and interest. Please let me know if I can be of any assistance.
