**ATTENTION CONTRACTORS AND TRUSS
MANUFACTURERS**

EFFECTIVE IMMEDIATELY

The City of West Palm Beach will adhere to the requirements of Florida Statutes Chapter 471 Engineering and the related rules FAC § 61G15-23.002 and FAC § 61G15-31.003 for signature, seal and date on engineering documents.

This causes each page of engineered truss drawings and design documentation to have the embossed seal, original signature, and the date of signing and sealing, when being submitted for public record. The cover or index sheet of the design documentation package may be signed and sealed in lieu of signing and sealing each individual sheet.

At least one complete set of truss drawings and layouts must have the seal, date, and signature, or they will be rejected.

Questions may be addressed to the Florida Board of Professional Engineers (FBPE) at 850-521-0500. The rules may also be reviewed in their entirety on their web site <http://www.fbpe.org>. Your cooperation in this matter is greatly appreciated.

Robert Brown, CBO
Building Official

“An Equal Opportunity Employer”
